## CAMI GROUP BECOMES THE ONE-STOP PARTNER FOR ALL YOUR INDUSTRIAL PROJECTS.

# CAMI GROUP TRIPLES ITS COMMITMENT

## THE EVOLUTION OF CAMI GROUP: COMPLETE SOLUTIONS IN HYDRAULICS & INDUSTRIAL AUTOMATION

Since our founding, we at CAMI have been leading contributors to the hydraulics industry by bringing our Italian and artisanal know-how to the market. In over fifty years of history, we have earned a high reputation as a company specializing in the repair, maintenance and sale of hydraulic pumps and motors. In other words, we are a point of reference in the national territory and for many productive realities. With the goal of providing complete and fast solutions, the CAMI Group has been structured into two internal divisions to offer an all-round service in hydraulics: CAMI Service and CAMI Solution. But the future, of course, never stops. Technological evolution is setting the pace, and companies need ever-evolving partners to deal with sudden, innovative and tailored changes. Hence, in 2025 we welcomed a third division into the Group, specializing in automation and electrification for industrial systems, namely CAMI Automation. Our choice to be more competitive and complete than ever before.

It is the **division specializing in repair, maintenance and sales of hydraulic pumps and motors**. This is our historic core business, the one for which we have always been recognized and appreciated. Through our Service, we are a **concrete and reliable reference point in the industry**.

The **technical heart of the company**. This division specializes in the **design and manufacture of hydraulic systems**, both for **revamping and customization of new interconnected systems**. **It is the CAMI tradition that evolves into innovation**.

CAMI's **new division**, created to integrate our know-how with automation. With the **strategic support of Bosch Rexroth**, CAMI Automation provides innovative solutions for direct repair and design of automated industrial plants and processes.

# CAMI SERVICE, THE EXCELLENCE IN HYDRAULICS

AT THE HEART OF OUR HISTORY  
TRADITION AND MECHANICAL CRAFTSMANSHIP

CAMI Service is the expression of over half a century of CAMI experience in the repair and overhaul of hydraulic pumps and motors for the industrial and the mobile sectors.

We strive to offer a service of authentic hydraulic excellence: with a quick diagnosis of the unit, we can repair it directly or replace the original component, and even rebuild parts that have been discontinued. And if the damage cannot be repaired, we supply the customer with alternative units from the world's leading hydraulics brands: Bosch Rexroth, Moog, Parker, Linde and Kral.

Our goal is the continuity of our customer's work: we provide immediate support with quality technicians and spare parts and preserve the efficiency of the hydraulic unit in a very short time.

# ASSEMBLY AND MAINTENANCE

## A SERVICE STRUCTURED IN 10 STEPS

A workflow that is precise and well tracked at every step is the strength of our CAMI Service division. From the telephone call up to the completion of the repair, **every step is managed with an eye to Industry 4.0 with MES software** to optimise processing and to carry out the work as efficiently as possible. In addition, CAMI operators monitor the job step-by-step in order to keep the customer informed of its status.

### UNIT DISASSEMBLY

The unit arrives at the island workstations of our in-house department, where it is carefully disassembled.

### COMPONENT CLEANING

Each piece is sanitised using ecological bicarbonate to ensure a contamination-free manufacturing process.

### WEAR CONTROL

The technician checks the state of the damage and decides whether it is repairable or not. In the latter case, we can provide alternative units from scratch.

### UNIT ANALYSIS

After the diagnostic and inspection phase on the part to detect the problem, it is possible to estimate the work with certainty.

### SPARE PARTS PICK UP FROM STOCK

If the damage can be repaired, the technician will pick up the original spare part from our automated warehouses, stocked with the best brands on the market.

### UNIT ASSEMBLY

Thanks to special automated platform scales that facilitate the assembly of the various components, the unit is reassembled on site by the technician.

### TESTING

The time comes to test the operation of the units. We use the most modern technology in the industry for this delicate operation.

### COATING

The unit is then coated to increase the quality of work and restore it to proper working order.

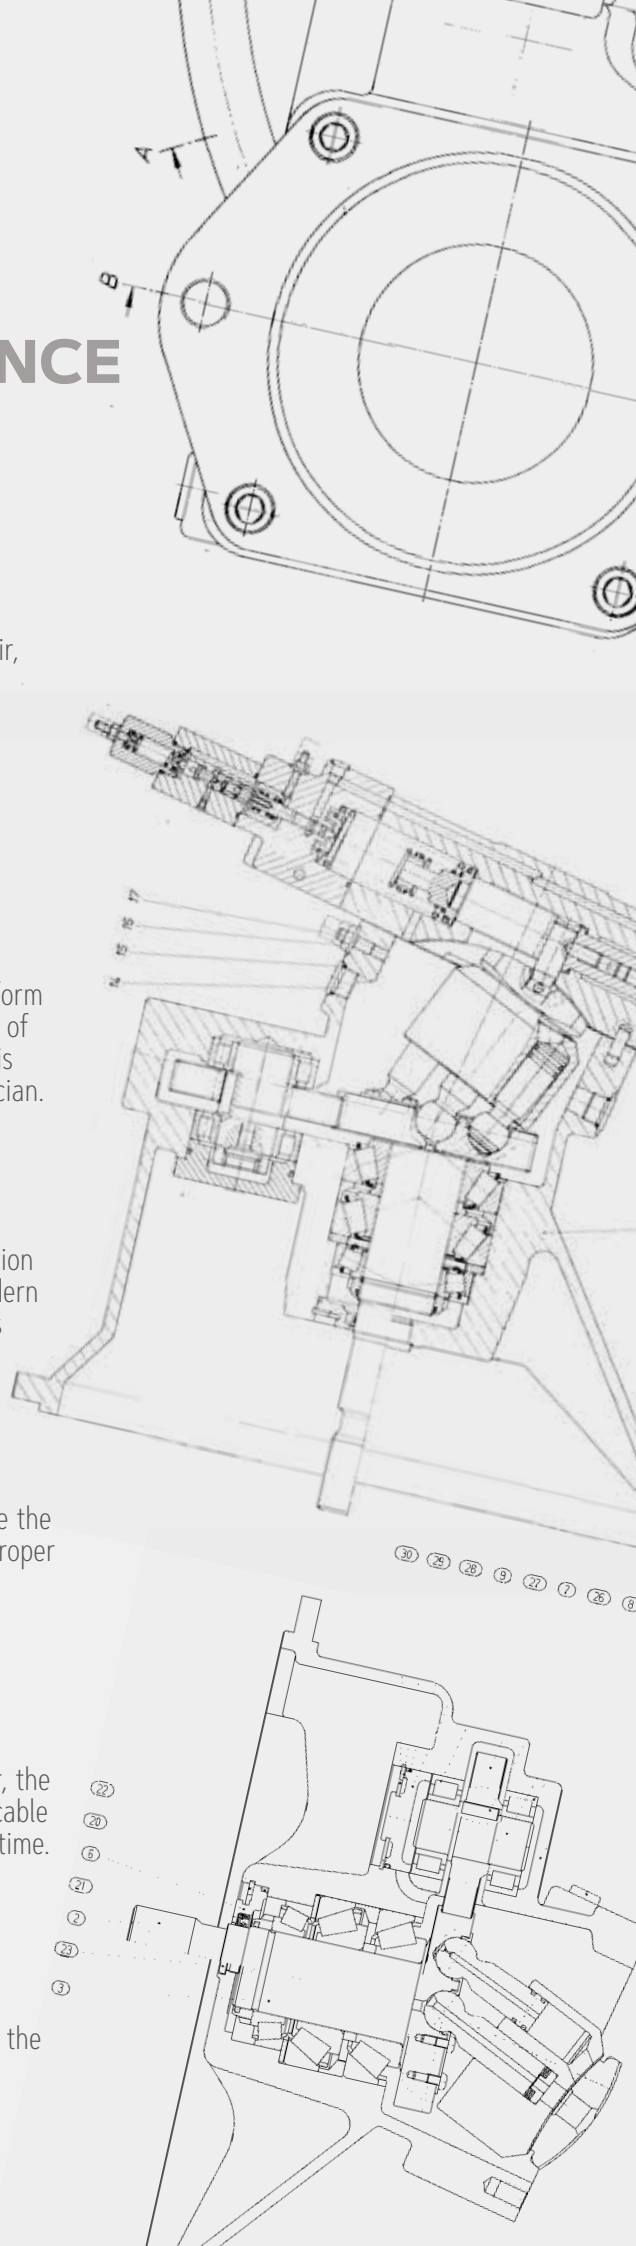

### LABELLING

The final step before handing over, the testimony of professionally impeccable work, a guarantee of quality over time.

### REDELIVERY

The unit is now ready to return to the customer's production process.

# METROLOGY ROOM

## INNOVATION IN QUALITY CONTROL

**We are in the operational core of CAMI Service.**

The **Metrology Room** is equipped with innovative equipment and measuring instruments that enable accurate **3D dimensional measurements, quality control** of customised components **and** in-house machining tests. We have created this environment to give absolute added value to our work.

The company employs experienced staff who are continuously trained in the latest technological developments and who are able to provide immediate responses to a market that is constantly evolving.

The **CAMI metrology room** comprises:

- Automated 3D measuring machine
- Automated optical measuring machine
- Roughness tester
- Altimeter
- HRC hardness tester
- HV hardness tester
- Endoscope
- Digital video control system
- Calibrated buffers
- Bore meters and micrometers

# TESTING

## VERSATILITY AND POWER FOR STATE-OF-THE-ART TESTING

The **Testing Room** is one of the flagships of our CAMI Service division. It allows us to achieve a level of technology higher than industry standards, anticipating the innovations of an ever-changing sector.

Modern, with one of the **first 770 kW test benches installed in Italy**, the Room is equipped with **3 workstations** with different control systems to test hydraulic pumps or motors, even with **high displacements** and of **different types**.

The phases of data acquisition, performance monitoring and recording of the values of the unit to be tested are managed through software designed for CAMI Service, the result of which is the **Certificate of Successful Testing** delivered at the end of each repair. **Versatility and great power at the service of the customer.**

# AN IMPECCABLE SERVICE

## FAST RESPONSIVENESS AND WIDE ASSORTMENT AT THE SERVICE OF THE CUSTOMER

When it comes to servicing a hydraulic system or replacing a worn part, **time is precious**. Any extra day saved is decisive in **reducing machine downtime** and thus avoiding prolonged stoppages of the production line. That is why at CAMI Service analysis of the work, **budgeting** and **agreement** with the customer are steps that are completed in **a very short time**. Our technical and commercial team is trained to provide an **immediate response** to the request with a synergistic activity that shortens the time needed to forecast costs, optimises expenses, and collaborates with the customer from the very first moment in order to carry out the work within a tight timeframe.

This speed is also made possible by the **large availability of spare parts** in stock: at CAMI Service we have a vast assortment in terms of breadth and depth, tracked through a **state-of-the-art computerised** logistics system. The best way to support any work, even the most urgent, with the right part.

## CAMI IS THE LARGEST ORIGINAL BOSCH REXROTH SPARE PARTS CENTRE IN ITALY

# SPARE PARTS AND SUPPLIES

## THE FIGURES OF CAMI SERVICE

The high quality of our work is supported by the **three automated vertical warehouses** for **handling hydraulic components and spare parts**. They are the core of CAMI Service's efficiency, guarantee of **speed, punctuality** and **safety**. Over 40,000 items are handled here, including 630 complete units from the best brands on the world market.

# ALL OUR BRANDS

## THE PARTNERSHIPS WITH THE INDUSTRY LEADERS

OUR LONG HISTORY AND THE VALUES WE CONVEY TO THE MARKET HAVE ENABLED US TO NETWORK WITH IMPORTANT GLOBAL SUPPLIERS WHO HAVE BECOME ESSENTIAL PARTNERS IN MEETING COMMON CHALLENGES. HERE THEY ARE.

### BOSCH REXROTH

CAMI is a **Service Partner** of the **Bosch Rexroth** brand, the world leader in hydraulic components and systems for industrial and mobile applications. In 2018 we became **Certified Excellence Service Partner**, an accolade of absolute value for competent advice, after-sales support and, above all, **quality repairs on Bosch Rexroth pumps and motors to the same standards of excellence** as the parent company.

### MOOG

CAMI is an **Authorized Distributor** of **Moog** products, a world leader in providing high performance motion control solutions and specializing in the design, manufacture and marketing of innovative solutions for industrial automation. We are also a repair centre for **RKPII pumps**.

### PARKER

CAMI is a Parker-recognised **Pump Service Centre** for repairs and service on Parker products. This link guarantees customers efficiency and precision for their needs in all respects.

### LINDE

The partnership with Linde Hydraulics as a **Service and Sales Partner** allows us to work together with an important technology partner for the entire world of plant engineering and construction, in order to offer increasingly advanced solutions.

### KRAL

Together with Kral, a company that develops and manufactures screw pumps and flow measurement technology, CAMI offers customers the best route available on the market according to their specific needs. CAMI is also a **repair centre and reseller of Kral screw pumps**.
